

Conquer transportation sustainability compliance

How we do it

Infios's industry-leading FAP solution helps shippers and carriers gauge their carbon emissions and implement measures to reduce or offset them. The introduction of Carbon Emissions Reporting into the Infios FAP Portal streamlines your transportation team's sustainability initiatives by utilizing standards from EPA and GLEC for emissions reporting.

Interactive and dynamic reports:

- Visibility into carbon emissions across all modes, carriers and services
- Reporting and analytics to filter relevant business attributes
- Access shipment-level details
- Gauge carbon emissions across all modes of transportation and implement measures

Key benefits

Accelerate internal initiatives related to sustainability

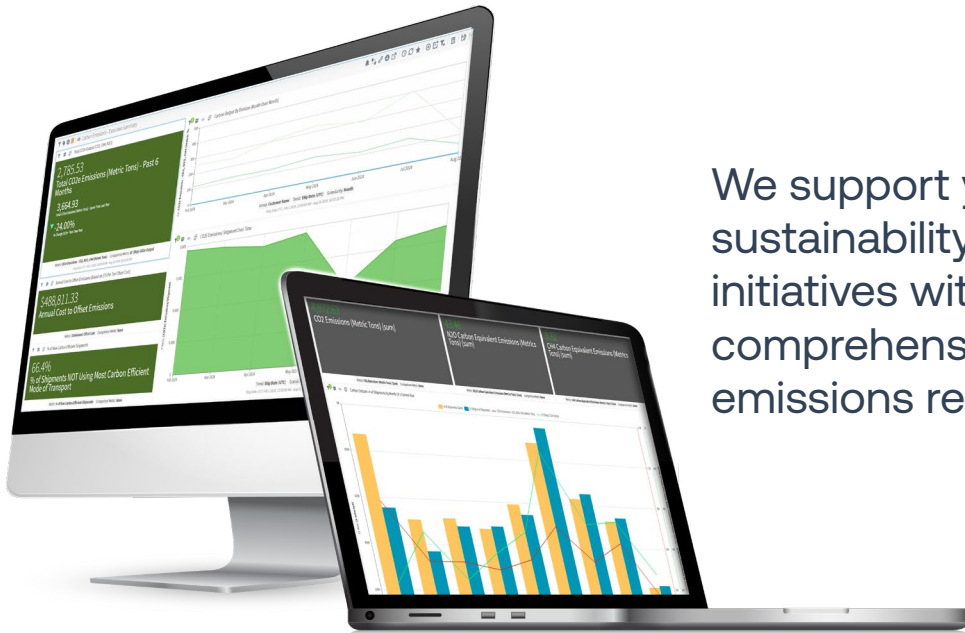

Carbon emissions reporting for stakeholders

Differentiate your brand, improve customer acquisition

Optimize service levels based on emissions impact

Access government subsidies and drive cost reductions through lower energy consumption

Trusted by Infios clients committed to sustainability

We support your sustainability compliance initiatives with comprehensive carbon emissions reporting.
