

Freight Audit and Payment (FAP)

Optimizing transportation cost for complex supply chains

The challenge

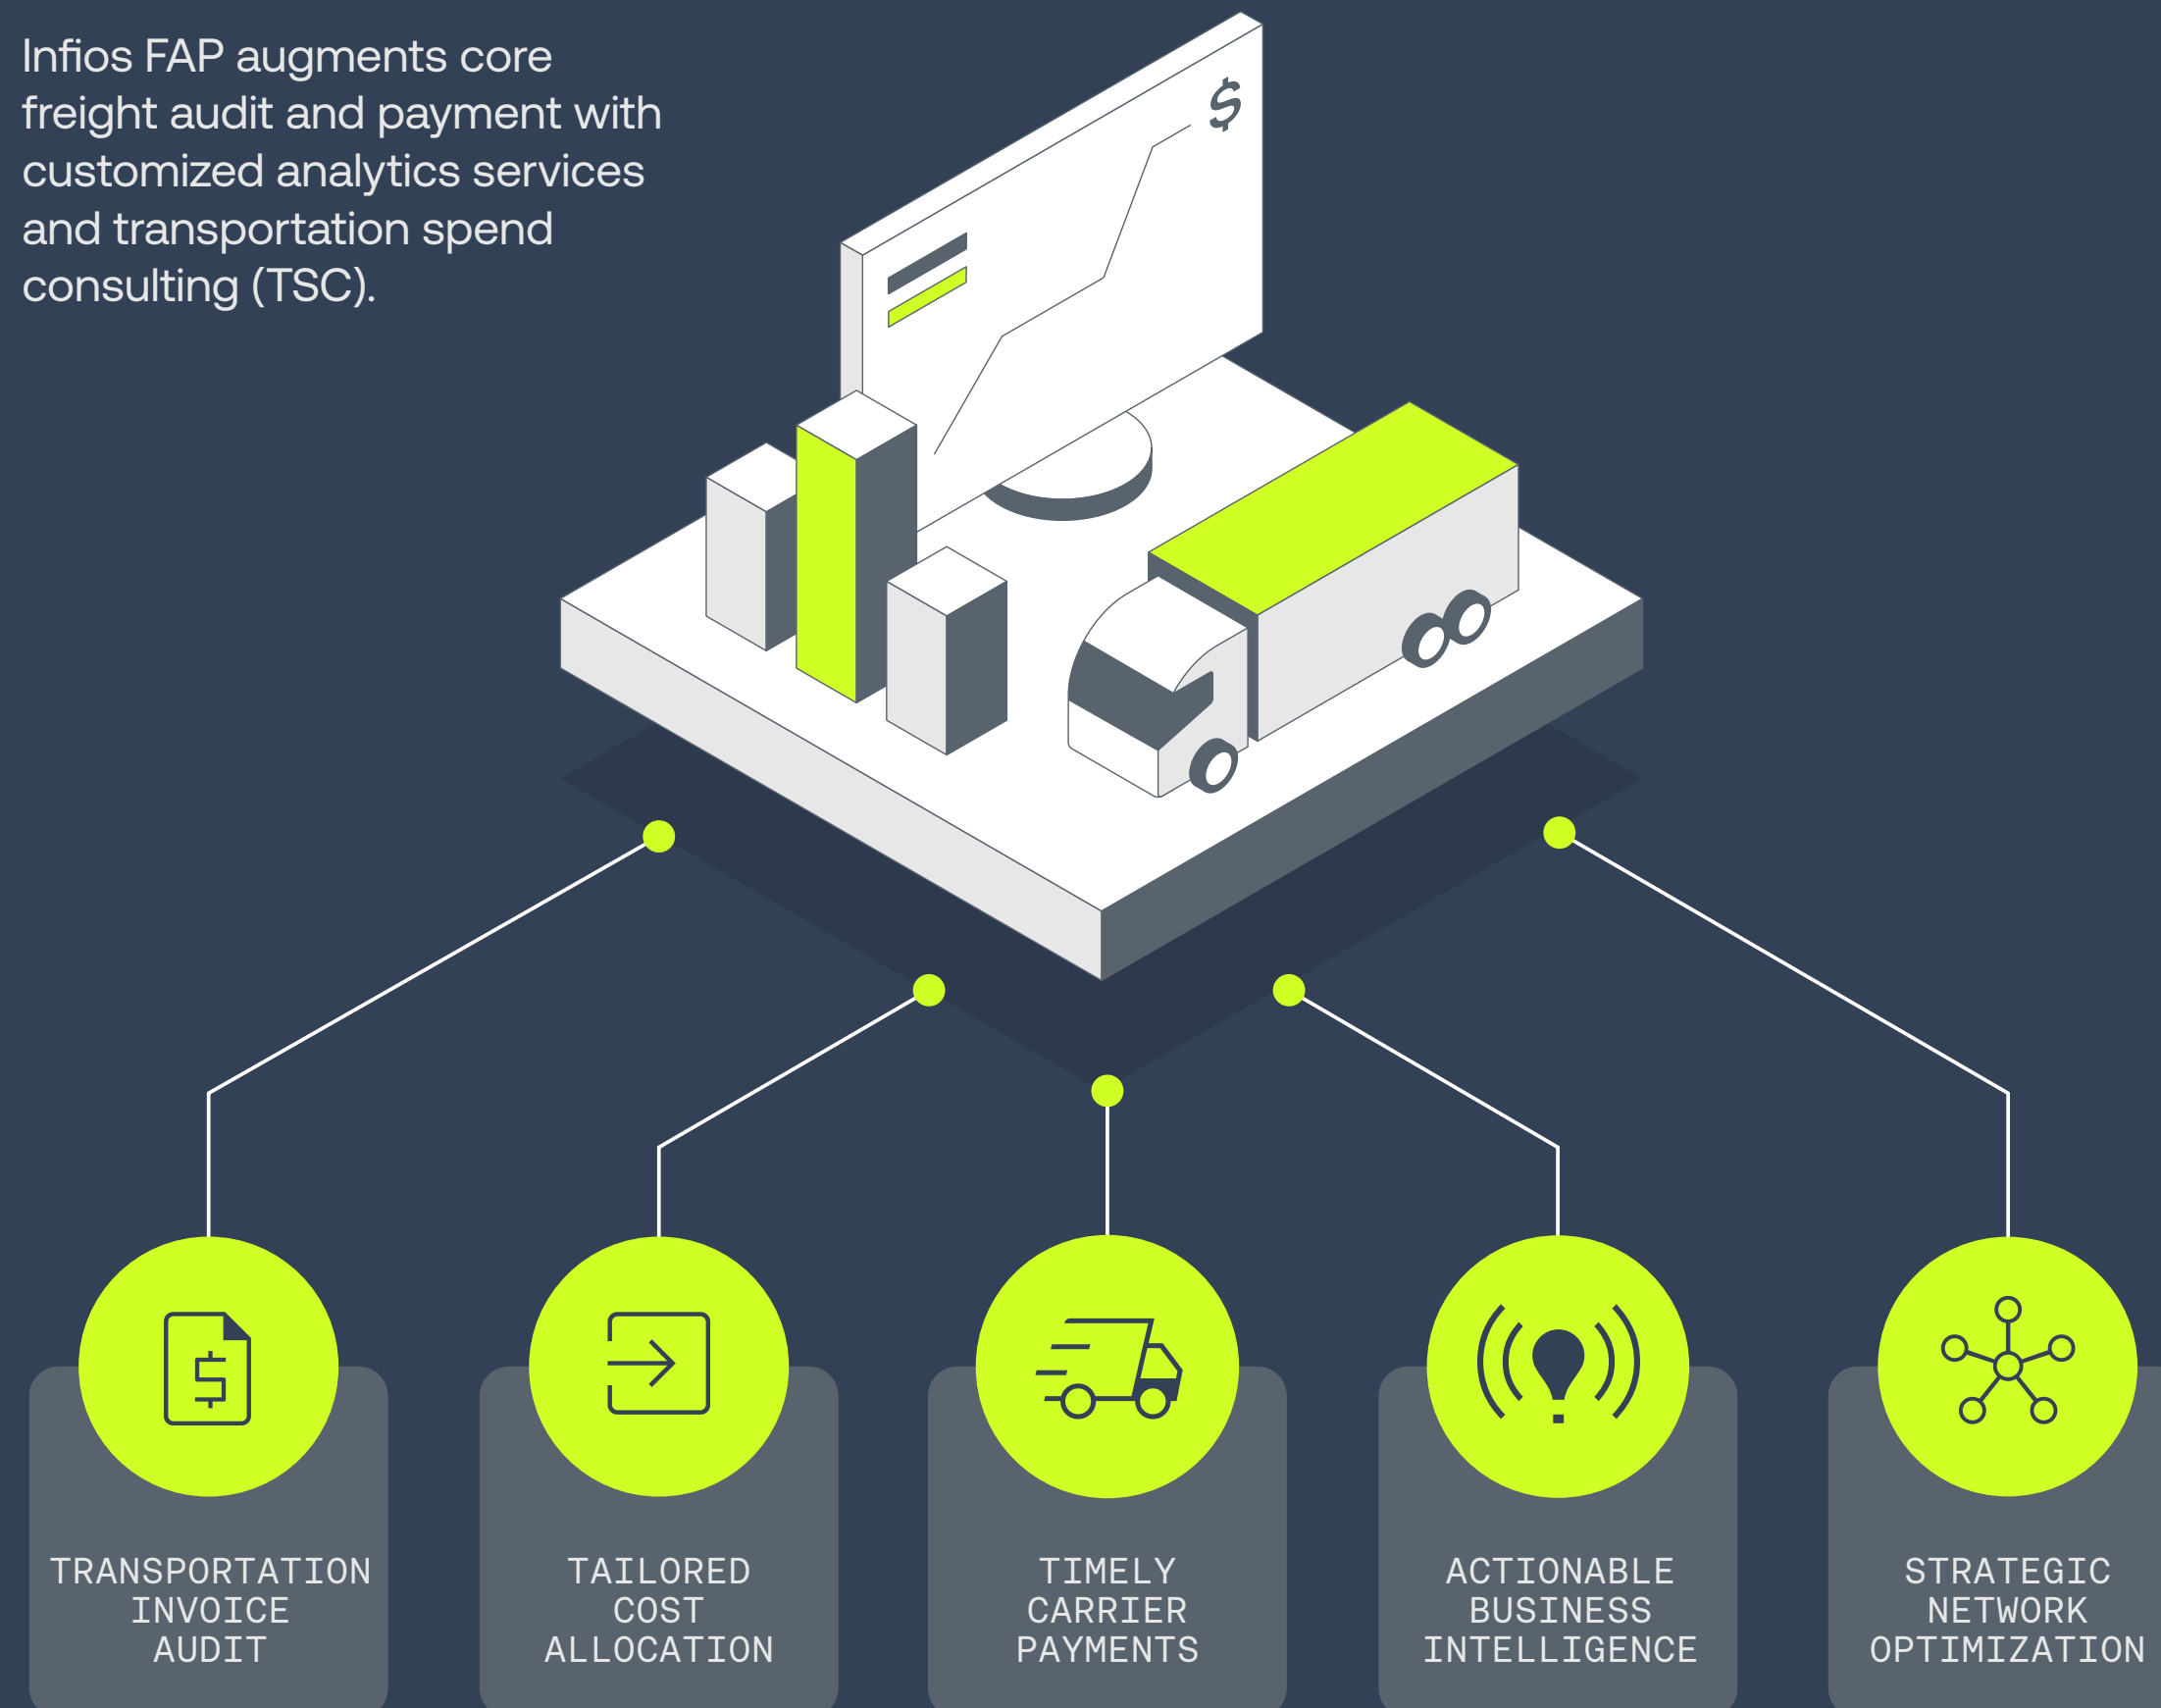

Traditional freight audit and payment solutions reduce cost—but they're not built for the complexity of today's global supply chains. Managing transportation spend and carrier performance becomes increasingly difficult.

This creates challenges:

- ▶ Rising transportation costs, inaccurate invoices and overpayments
- ▶ Limited visibility into spend and operational performance
- ▶ Inefficient carrier management and inconsistent service levels
- ▶ Suboptimal contracts with outdated rates and conditions
- ▶ Cost allocation issues and skewed financial reporting

What is Infios FAP?

Infios FAP augments core freight audit and payment with customized analytics services and transportation spend consulting (TSC).

Key capabilities

- ▶ Global invoice audit and payment (160+ currencies)
- ▶ Invoice and audit exception handling
- ▶ Freight and parcel credit management
- ▶ Dedicated business analysts that extend customer teams
- ▶ In-house transportation spend consulting including carrier sourcing and contract optimization

Core benefits

- ▶ Reduces transportation costs and improves margins
- ▶ Boosts operational efficiency by automating audits and payments
- ▶ Extends team bandwidth and expertise
- ▶ Improves visibility and control with advanced analytics
- ▶ Strengthens carrier relationships

Why Infios FAP?

- ▶ Proven FAP solution with true global scale
- ▶ Strategic support that augments internal capabilities
- ▶ Deep transportation expertise and long-tenured teams
